- Sports Festival**

Sports Festival

We are part way through October now at Kei-Sho, and the first of our 3 big events is now over. We held our Sports Festival at the start of October at Keika's Urawa ground. The day was full of action and emotion, and the students had a great time!

Sports Festival:

On October 8, Kei-Sho held our annual Sports Festival. The day started early at Keika's sports ground in Urawa. The weather was unfortunately hot, with few clouds in the sky. We were concerned about heat stroke and dehydration, but fortunately there were few cases.

Students from the Sports Festival committee and student council arrived early to set up, and the opening ceremony was at 9:00. From there, students did some warm-ups and started the first event: jump rope.

This time the Sports Festival was held without a full practice day, so there were some issues with the program. However, the students came together and did their best, and with the support of the teachers the day progressed smoothly.

Each grade was separated into their own team, so the 1st, 2nd and 3rd grades competed against each other. Each grade had their own team colour, and each class designed their own T-shirts to wear on the day. It was interesting to see all the different designs.

There were also fewer individual races this year, instead focusing on team events such as the Big Ball Roll and Eye of the Typhoon.

The day ended a bit later than expected, with the 3rd graders coming in first place.

Like every year, the students had a great time at the Sports Festival. While the 3rd graders won, it seemed like everyone had fun. The Sports Festival was a huge success, but now that it's over, it's time to focus on the Keika Festival which is only a few days away. - Llew
