

Kei-Sho Chronicle - November 2023 Business Skills Competition

This Issue:
- Founding Day
- Business Skills
Competition

After October, and the big events within, students needed a break. However, there was still more planned for November. Every year on the first of November, Keika celebrates its founding day. Leading up to this, Kei-Sho holds an anniversary event in the last week of October. But that was not all. November is also the month when the annual Business Skills Competition is held at Kei-Sho. As a commercial school, Kei-Sho prides itself on teaching students various business-related skills. And the Business Skills Competition allows students to compete using these skills, to see who has learned the most.

Business Skills Competition:

On November 8th, Kei-Sho held our traditional Business Skills Competition. While to people outside of Kei-Sho it may sound boring, it is one of the most popular events among the students and teachers. In this event, students from every class compete against each other, testing how much they have learned studying business skills at Kei-Sho.

The day starts with an individual event, where every student completes a short test. The students with the best scores add to their class totals.

Then the main events start, with the accounting, logic, and calculating competitions. In accounting, students test their bookkeeping skills; in logic, students need to complete riddles; and in calculating students race to complete difficult calculations. In these events, students work individually to complete their tasks, then combine their results as groups, where they can run to the referee to check their answers. The groups then combine their answers to get a class total. The first class to complete every group and get the correct class answer wins.

After the main events, there was a speed-typing event with volunteers from the 2nd and 3rd year. These students competed in how fast they could type out a prepared passage, with as few mistakes as possible. The winners of this event got personal prizes as well as adding to their class scores.

The last event of the day involved only the 1st year classes. In this event they combined questions of all 3 main events, as well as personal questions about the teachers, to find the newcomer champion.

Coming first place in two events, and with strong individual scores, the day concluded with 3C becoming the champion. However, every student from every class did an amazing job in creating an exciting event and great memories. Every correct answer was met with cheers, and every incorrect answer was met with cries, and a renewed energy to get it right next time. It is always nice to see the students practice what they have learned and have fun doing it. - Llew

Event	1 st	2 nd	3 rd
Accounting	3C	3D	3B
Logic	3C	2C	1D
Calculating	2A	2C	3C
1 st year	1A	1B	1C
Total Score	3C	2C	3D
